

LoveTown is the award-winning pop-musical tale of a mysterious bar singer, helping three wandering souls find their way back to love. All the while... her time is running out.

Set in Hanny's bar at the corner of Angst & Desperation, LoveTown finds its voice in new, original rock songs and an engaging storyline. It's an intoxicating blend of dark wit, naked honesty and the hope that comes from songs that say the things we wish we could put into words.

Originally premiering as a live stage show at an international music festival, LoveTown is the first feature film by husband/wife team Jay & Ann-Janette Webster. It has since been celebrated at festivals and screenings across the country. LoveTown's theme is simple: "pain shapes us, but it's love that defines us".
